Portable Compressors

Mobilair™ M15 / M17**Compact and Reliable**

The new Mobilair™ M15 and M17 are rugged and dependable units that are perfect for a variety of applications. Light construction, carpentry and monument engraving are just a few jobs where the M15 and M17 are ideal. With a folding handle, oversized pneumatic tires and compact design, these units are easy to move around virtually any job site.

The M15 and M17 feature Kaeser's power saving Sigma Profile™ airend. This efficient Kaeser design maintains steady pressure and puts out more air

per hp, saving you gas. Driving these airends are quiet but powerful Honda engines with modulation control which match air output to the load demand. They both have a simple electric starter with keyed ignition and an easy-to-read control panel.

The scratch, dent and impact resistant rotomolded polyethylene shell takes a beating and still protects the unit. Inside, the compressors are protected by 4 micron inlet filters rated at 99.9% efficiency, allowing these units to operate in virtually any construction environment.

Capacity: 50 cfm or 60 cfm
(operates up to 60 lb. paving breaker)

Pressure: 100 psig

Standard Features:

- Single stage, oil injected rotary screw airend with power-saving proprietary Sigma Profile
- 4-cycle, V-twin industrial duty Honda engine
- Engine rated 20 hp (M15) and 25 hp (M17)
- Uses lead-free gasoline
- Compressor and engine are disengaged for easy starting, even in cold conditions
- Convenient one-touch electric start
- Belt-driven with a three-groove power band
- Control panel displays pressure, discharge air, temperature, and hour meter
- Protective rotomolded polyethylene enclosure
- Vibration isolation for smooth, quiet operation
- 4 micron air intake filters protect the airend

Optional Features:

- Skid mounting
- Five year airend warranty
- Higher pressures available
