**Aluminized** - .4 oz. 9 gauge and .35 oz. 11 gauge

**Vinyl Coated** - Black, Woodland Green, Forest or Enser Green, and Brown

**Stainless Steel** - Call for availability

#### Easy Twist™ Ties

Designed for commercial and some corrections use with 2-inch mesh.

- Tie goes around post and one picket.
- Can be twisted in back of or side of post.
- Shaped to fit post/rail without opening tie.
- Ties are pinched together easily and twisted with drill for quick installation.

#### Easy Twist™

Tension Wire Ties.

- Pre-shaped tie goes around fabric and tension wire.
- Tie is twisted with drill.
- Easier on hands than hog rings.
- Stronger than hog rings.
- Helps reduce false alarms with perimeter security devices.

#### Easy Twist™ T-Post Ties

Designed for 1.33 #/ft. T-post.

- Pre-shaped tie goes around post and wire.
- Tie is twisted to side of post with cordless drill.
- Pays for itself with increased production.

#### Twist Tight® Ties

For correctional installations with 2-inch mesh.

- Pre-shaped to fit around two sides of a diamond to create tighter fabric tension.
- A better bond between tie, fabric and post to reduce problems with electronic surveillance systems.
- Ends twisted opposite fabric, away from inmates.
- Won't fall off before twisting.
- Don't need to be trimmed, eliminating cleanup.

#### Side Twist Tight® Ties

Designed for correctional, commercial installations with 2-inch mesh.

- Pre-shaped to fit around two sides of a diamond but are twisted on the side of the post to reduce risk of injury to passing personnel.

#### Mini Mesh Twist Tight® Ties

Designed for smaller mesh sizes (1-inch, 1/2-inch or 3/8-inch).

- Shape designed to be installed through the mini mesh around the post.
- Twist on back side with drill for easy installation.
- Tie ends can be bent down to prevent injury to passing personnel.

#### Welded Wire Twist Tight® Ties

Designed for welded wire mesh for correctional, commercial applications.

- Pre-shaped to fit various wire mesh and around the post.
- Ties are pinched together and twisted with drill for easy installation.
