

PULL OR DRIVE A POST WITH

# FORCE

## Rhino Post Drivers/Pullers

Rhino Post Drivers deliver up to 1,700 blows per minute. One moving part, a reciprocating piston, strikes directly on the post or drive cap. The drivers have low air consumption rates, are light-weight and portable, ideal for driving in places that are hard to reach. A variety of master chucks are available to match your post, including wood posts. The Filter-Regulator-Lubricator accessory takes out water, regulates the pressure and puts oil in the line to lubricate the piston. Rhino Post Pullers come in manual and hydraulic models. Both are easily carried and easy to operate. There are six post drivers available and two post puller models.

The **PD-39 Post Driver** is easily operated by one worker and is the perfect choice for driving all types of steel posts.

The **PD-55 Post Driver** can be operated by one worker and is the perfect choice for driving ground rods, delineator posts and various types of steel posts.

The **PD-39P Panel Post Driver** ensures fast erection of temporary panel fencing. It is easily operated by one worker.

The **PD-110 Post Driver** is the perfect choice for driving telespar and various types of steel post.

The **PD-45 Post Driver** can be operated by one worker and is the perfect choice for driving ground rods and various types of steel posts.

The **PD-140 Post Driver** is the perfect choice for driving Beams, Round, Square or Rectangular Tubing, Wood Posts, Stakes or any shape up to 4 inches.

The **PL-3 Post Puller** is easily operated by one man. The operator activates the hydraulic pump producing over 3 tons of pressure to pull the post.

The Model **MP-3 Post Puller** weighs only 39.54 lbs (17.94 kg) and is easily operated by one worker.

### Post Drivers/Pullers Features *at a glance*

Advantages	Post Driver Specifications Weight and I.D. Master Chuck Size	Post Puller Specifications
